Edit Code

```
1 class Solution {
2     func moveZeroes(_ nums: inout [Int]) {
3         _ = nums.halfStablePartition(isSuffixElement: { $0 == 0 })
4         return
5     }
6 }
7
8 extension MutableCollection {
9     /// Moves all elements satisfying `isSuffixElement` into a suffix of the collection,
10    /// returning the start position of the resulting suffix.
11    ///
12    /// - Complexity: O(n) where n is the number of elements.
13    mutating func halfStablePartition(isSuffixElement: (Element) -> Bool) -> Index {
14        guard var i = firstIndex(where: isSuffixElement) else { return endIndex }
15        var j = index(after: i)
16        while j != endIndex {
17            if !isSuffixElement(self[j]) {
18                swapAt(i, j)
19                formIndex(after: &i)
20            }
21            formIndex(after: &j)
22        }
23        return i
24    }
25 }
```
